

LETTER OF RECOMMENDATION

The Elko Group, which dates back to 1993, is one of the leading distributors of IT equipment, electronic products, and IT solutions for consumers. With 16 branches worldwide, we represent more than 400 manufacturers in the IT industry. In 2007, the Elko group became the first Latvian company to achieve a turnover of \$1 billion, which only confirms the dynamic development of the company. Our role as a global distributor of IT products and solutions is to combine the knowledge of our partners and share it with our customers.

In 2018, the Elko Group, based in Riga, decided to expand its operations with a branch in Poland. After receiving several offers and going through numerous consultations on the terms of cooperation, we decided to establish cooperation with JWW, which had already taken up the registration of the company. The completion of all the procedures and formalities involved made it possible to quickly begin operations on the market. Through mediation in obtaining individual tax interpretations, we have been able to adapt the most advantageous development strategies both to the current legislation and to international standards. The key element for us is the financial reports, which clearly indicate the financial situation of the company. A well-organized and well-conducted way of accounting translates into hassle-free tax refunds, which only assures us that a team of professionals is watching over the financial security of the company.

The JWW accounting office, using its experience and interdisciplinary knowledge, guarantees us the security and support of a solid business partner.

A handwritten signature in black ink, appearing to read "A. Gavrilovs". The signature is fluid and cursive, with a large loop at the end.

Andrejs Gavrilovs

Vice President of the Board
