LETTER OF RECOMMENDATION

Logistics is something we understand, something we're able to do and apply in our daily activities. The continuity of a supply chain is work that Transgrupa is doing with the highest effectiveness. An experienced and educated team of employees works hard every day to provide our customers with a maximum optimization of logistics processes that are in line with the world's highest standards.

In our line of business, the precision, comprehensibility and meeting deadlines are extremely important and these were the qualities we expected from the accounting office that would keep our books. After a long search we decided to start working with JWW accounting office that has been supporting our company's growth for 3 years now. The professional help and guidance of the whole team helps us optimize costs connected with our activities. We always get the reports for financial results on time which highlights JWW's professional approach.

We can wholeheartedly recommend JWW accounting office because we're aware how much it supports Transgrupa every day.
