

LETTER OF RECOMMENDATION

MULTISUN is one of the first companies in Poland offering professional services related to the design and implementation of photovoltaic systems, which significantly reduce the costs and guarantees energy independence. Our history with photovoltaic technology dates back to 2013. Experience gained at home and abroad resulted in the creation of two small companies, which over time turned into a new brand Multisun. Since 2016, we have also been active in the field of educational and promotional activities. Our faith and commitment to renewable energy sources helped shape and influence the young market, which is why we value our experience with our business partners.

Responding to the needs of the market and interest in our services, we have expanded our activities to more branches in Poland. For this reason, it is very important for us to carefully record the costs associated with ongoing projects and implementations. Thanks to specialists from JWW we get a clear picture of the financial situation of our company. The HR and payroll department also ensures the correct calculation of salaries for our employees, as well as ensures the completeness of employment-related documentation. Experience, knowledge, and commitment are the characteristics that distinguish JWW from other accounting offices.

In view of the above, we strongly recommend cooperation with the JWW accounting office.
