

Wrocław, 2021-02-22

IDEACTO is a UX & CRO agency with 12 years of experience. We specialize in eCommerce. We have completed 400+ projects and worked 300,000+ hours together with our clients.

In 2020, we decided to change the accounting office because we were looking for a business partner who would support us in the new challenges created by the current market. The most important aspects of cooperation for us were the quality of communication, the creation of usable tools, and the easy-to-digest manner of presenting the information.

Thanks to our cooperation with JWW, we have managed to regulate the company's accounting matters, and consequently - with a clear picture of the financial situation – set new goals for Ideacto in complete safety.

Nikodem Krajewski
President of the Management Board
