LETTER OF RECOMMENDATION

ASI ValueTech Seed is a seed fund that invests in start-ups, offering ready-made solutions for industry, especially in the *sphere of sustainable sources of energy*. The fund's team consists of former entrepreneurs and managers, gaining their experience in the international environment. Through its partnership with the MIT Enterprise Forum and MassChallenge - two leading organizations supporting start-ups - ASI ValueTech Seed has the opportunity to connect portfolio companies with global innovation hubs from Israel, London and Boston.

Due to the large scale of the fund's activities, communication and effective information flow are particularly important for us. The whole team makes every effort to ensure that all cases are handled as efficiently and quickly as possible. Non-standard solutions based on knowledge and experience allow us to implement the appropriate tools to optimize the operation of ValueTech Seed. It is essential to record sources of funding with due diligence, which has a direct impact on the financial situation. It is also important to submit timely accounts and reports on our behalf. The professionalism of the JWW accounting office was confirmed by the results of the verification activities carried out by the National Centre for Research and Development. The team's substantive support during organizational and legal changes has also proved to be extremely helpful.

Our cooperation with JWW began in 2017 including successfully conducted full accounting, which considers the specifics of our activities, as well as human resources and payroll services.

On behalf of Valuetech

Wojciech Ratymirski – Partner
